UNPLND Brand Guidelines

Version 1.0

Brand Identity

UNPLND is not a technology company.

UNPLND is a lifestyle brand.

Technology is invisible.

Experiences are visible.

The AI is not the product.

The evening is the product.

Brand Mission

Help people spend less time planning.

Help people spend more time living.

Every recommendation should become a memory.

Brand Personality

If UNPLND was a person...

Age:

24

Personality:

Confident

Relaxed

Funny

Adventurous

Friendly

Curious

Reliable

Emotionally intelligent

Never arrogant.

Never loud.

Never cringe.

Never "startup bro."

Brand Keywords

Warm

Cozy

Premium

Modern

Organic

Authentic

Minimal

Friendly

Smart

Optimistic

Human

Adventurous

Emotional Goal

Before opening the app:

"I'm bored."

After opening the app:

"Oh that's actually a cool idea."

After using the app:

"That was one of the best evenings we've had."

Brand Promise

We don't promise more options.

We promise better decisions.

Brand Voice

Every sentence should sound like it came from a good friend.

Never robotic.

Never corporate.

Never exaggerated.

Never clickbait.

Never salesy.

We Say

Let's go.

Ready?

Your evening starts here.

Found something you'll love.

One more idea.

Trust us.

Tonight looks good.

Made for you.

We Never Say

Powered by AI.

Machine Learning.

Neural Network.

Algorithm.

Revolutionary.

Disruptive.

State-of-the-art.

World-class.

Cutting-edge.

Innovation.

These words feel cold.

People don't care.

Tone of Voice

Short sentences.

Simple language.

Positive energy.

Relaxed.

Human.

Confident.

Never too many emojis.

Never too many exclamation marks.

Logo Rules

The logo must always feel premium.

Never stretch it.

Never rotate it.

Never use gradients inside the wordmark.

Never add shadows.

Never use outlines.

Always leave generous spacing.

The app icon should always be recognizable at 32px.

App Icon

Simple.

Rounded.

Minimal.

Recognizable.

One symbol.

No text.

Works in dark mode.

Works in light mode.

Works on iOS and Android.

Color Philosophy

Colors should feel like:

Golden hour.

Warm cafés.

Summer evenings.

Sunset.

Soft lighting.

Wood.

Paper.

Coffee.

Cream.

Not:

Gaming RGB.

Neon.

Corporate blue.

Tech green.

Cold gray.

Photography Style

Natural light.

Golden hour.

Friends laughing.

Real moments.

No staged stock photos.

No fake smiles.

No office photos.

No laptops.

No business people.

Real life only.

Illustration Style

Minimal.

Organic.

Rounded.

Friendly.

Small details.

Warm colors.

Never childish.

Never cartoonish.

Animation Style

Slow.

Smooth.

Natural.

Elegant.

Confident.

Animations should feel expensive.

Nothing should bounce aggressively.

Nothing should spin.

Nothing should flash.

Social Media

UNPLND does not create content about technology.

UNPLND creates content about experiences.

Good examples:

"AI planned our perfect first date."

"Can AI save a boring Saturday?"

"We gave AI €20 to plan our night."

Bad examples:

"Today we built Firebase."

"We fixed a bug."

"We updated our backend."

Nobody outside developers cares.

TikTok Strategy

Hook with the problem.

Show the experience.

Reveal the app.

End with curiosity.

The video is about the evening.

Not the app.

Community

Users should feel like they belong.

Encourage sharing.

Encourage inviting friends.

Celebrate memories.

Celebrate spontaneity.

Premium Feeling

Premium is not expensive.

Premium is attention to detail.

Perfect spacing.

Perfect animations.

Perfect typography.

Everything should feel intentional.

Accessibility

Premium products are usable by everyone.

Accessibility is part of the brand.

Not an afterthought.

Brand Test

If you remove the logo...

Could someone still recognize this as UNPLND?

If not...

The branding is not strong enough.

Final Principle

UNPLND should never feel like software.

It should feel like the beginning of a great story.

Claude Instructions

Whenever you build a screen...

Ask yourself:

Does this feel warm?

Does this feel premium?

Does this feel effortless?

Would someone enjoy looking at this for five minutes?

If not...

Improve it.

Never settle for average.
