08_COMPONENTS.md

UNPLND Component Library

Version 1.0

Purpose

Every UI element inside UNPLND must be built from reusable components.

Never duplicate components.

Never redesign existing components.

Every screen is built from this library.

General Rules

All components must support:

- Light Mode
- Dark Mode
- Dynamic Type
- Accessibility
- Loading State
- Disabled State
- Error State
- Press Animation

Every component should feel alive.

Animation Standard

Press Duration

120ms

Release

180ms

Scale

0.97

Easing

Ease Out

Animations should feel soft.

Never aggressive.

Haptics

Selection

Light

Primary Action

Medium

Success

Success Feedback

Error

Error Feedback

Never vibrate unnecessarily.

Primary Button

Purpose

Main action on every screen.

Examples

Create Plan

Continue

Save Album

Start Route

Height

56

Radius

20

Horizontal Padding

24

Vertical Padding

16

Shadow

Small

Typography

Button Large

Semibold

States

Default

Pressed

Loading

Disabled

Success

Error

Rules

Only ONE primary button per screen.

Never place two primary buttons next to each other.

Secondary Button

Purpose

Alternative actions.

Outlined.

Lower visual hierarchy.

Examples

Skip

Later

Back

Retry

Height

52

Radius

18

Shadow

None

Icon Button

Purpose

Favorite

Share

Bookmark

Settings

Close

Radius

999

Minimum Size

48x48

Icons

24x24

Floating Action Button

Purpose

Rare.

Only when the primary action needs constant access.

Examples

Quick Plan

Never overuse.

Navigation Bar

Height

iOS Standard

Large Titles supported.

Blur

Native iOS Material

Never custom gradients.

Bottom Navigation

Maximum Tabs

5

Recommended

Home

Discover

Planner

Albums

Profile

Always visible.

Card System

Cards are the heart of UNPLND.

Every card follows:

Radius

28

Padding

24

Soft Shadow

Warm Background

Subtle Border

Cards should invite interaction.

Restaurant Card

Contains

Image

Cuisine

Rating

Price Level

Distance

Open Status

Estimated Stay Time

Primary CTA

Reserve / Navigate

Activity Card

Contains

Activity Image

Title

Duration

Price

Indoor / Outdoor

Distance

Tags

CTA

Memory Card

Contains

Cover Photo

Date

Location

Mood

People

Number of Photos

Open Album CTA

Profile Card

Contains

Avatar

Name

Streak

Cities Visited

Albums

Friends

Premium Status

AI Recommendation Card

Purpose

Highlight AI generated suggestions.

Contains

AI Badge

Short explanation

Reason

Confidence

Alternative Button

Regenerate Button

Mood Selector

Selection Type

Single Choice

Visual Style

Large rounded chips

Examples

Cozy

Adventure

Party

Romantic

5–8

9+

Search Bar

Rounded

Persistent

Voice Search Ready

Placeholder

Search places...

Never use tiny search fields.

Bottom Sheet

Radius

32

Blur Background

Yes

Dismiss

Swipe

Tap Outside

Close Button

Supports

Half Height

Full Height

Modal

Used only for important actions.

Examples

Delete Album

Leave Group

Cancel Plan

Never interrupt unnecessarily.

Toast

Appears from bottom.

Auto dismiss

3 seconds

Examples

Plan saved

Album created

Memory shared

Friend added

Loading Skeleton

Always preferred over spinner.

Skeleton should resemble final layout.

Never show empty screens.

Empty State

Every empty state includes:

Illustration

Headline

Short explanation

Primary CTA

Never show:

"No Data"

Instead:

Let's create your first adventure.

Premium Banner

Soft.

Elegant.

Never aggressive.

Never flashing.

One CTA only.

Notification Badge

Small

Subtle

Warm Accent Color

Never oversized.

Component Rules

Every new screen must use existing components.

If a component does not exist:

Create it here first.

Only then use it.

Never create screen-specific components without updating this document.

Naming Convention

PrimaryButton

SecondaryButton

RestaurantCard

MemoryCard

AlbumCard

MoodChip

BudgetSlider

BottomSheet

SearchBar

ProfileHeader

TimelineCard

AIRecommendationCard

Names must remain consistent across the codebase.

Golden Rule

Components create consistency.

Consistency creates trust.

Trust creates premium perception.

Never sacrifice consistency.

Claude Instructions

Before creating any UI:

1. Check whether a component already exists.
2. Reuse it.
3. Extend only if absolutely necessary.
4. Update this document if a new reusable component is introduced.

Never invent duplicate UI elements.

Every pixel should belong to the same design language.
