13_MVP_SCOPE.md

UNPLND MVP Scope

Version 1.0

Purpose

This document defines exactly what belongs in Version 1.0 of UNPLND.

Nothing more.

Nothing less.

The MVP should solve one problem exceptionally well.

It should not try to solve every problem.

MVP Definition

The MVP is successful if a new user can:

Download the app.

Create an account.

Generate a complete evening.

Navigate through the evening.

Automatically receive a memory album afterwards.

Everything else is optional.

Core User Problem

Users waste too much time deciding what to do.

The MVP exists to eliminate this problem.

MVP Principles

The MVP must be:

Useful.

Fast.

Beautiful.

Reliable.

Shareable.

Simple.

Premium.

Included Features

Authentication

- Email
- Apple Sign-In (iOS)
- Google Sign-In
- Guest mode (optional, local only)

Onboarding

- Welcome
- Value proposition
- Location explanation
- Notification explanation
- Account creation

Home

- Greeting
- Weather
- Continue current plan
- Create new plan
- Recent memories
- Suggested categories

AI Planner

User chooses:

Mood

Budget

Group Size

Transportation

Available Time

Optional Preferences

Generate Plan

Route

Generated route including:

Restaurant

Activity

Optional Bar

Optional Club

Alternative suggestions

Estimated timeline

Travel time

ETA

Google Maps Integration

Open navigation.

Return to UNPLND afterwards.

Continue route.

Timeline

Current stop.

Completed stops.

Upcoming stops.

Estimated duration.

Progress indicator.

Memory Albums

Automatic album creation.

Map.

Timeline.

Photos.

Date.

Weather.

Notes.

Sharing.

Favorites

Save places.

Create collections.

Reuse later.

Discover

Trending ideas.

Seasonal suggestions.

Nearby inspiration.

No social feed yet.

Profile

Statistics.

Albums.

Favorites.

Premium.

Settings.

Settings

Notifications.

Privacy.

Dark Mode.

Language.

Delete Account.

Support.

Premium

Unlimited plan generations.

Advanced filters.

Exclusive collections.

Future benefits.

No ads.

Explicitly Excluded

The following features are **NOT** part of MVP:

Chat

Friend requests

Groups

Leaderboards

Voting

Public profiles

Comments

Likes

Business dashboard

Restaurant management

Creator program

Widgets

Apple Watch

Wear OS

Desktop

Web App

Marketplace

Event booking

Payments between users

Technical Constraints

The MVP must remain:

Maintainable.

Scalable.

Testable.

Deployable.

Every feature should be production-ready.

Performance Targets

Cold Start

<2 seconds

Planner

<8 seconds

Navigation

<300ms transitions

Albums

Open instantly when cached

Crash-free sessions

99.9%

Quality Standards

No placeholder screens.

No unfinished UI.

No "coming soon" pages.

No fake buttons.

No broken flows.

Every visible feature must work completely.

Success Criteria

A user should be able to:

Plan an evening.

Enjoy it.

Save the memories.

Recommend the app to a friend.

Without assistance.

Future Features (Not MVP)

Social Graph

Chat

Friend Activity

Collaborative Planning

Live Planning

AI Chat Companion

Travel Mode

Road Trips

Challenges

Achievements

Voting

Shared Albums

Events Marketplace

Creator Profiles

Business Partnerships Dashboard

Advanced AI Personalization

Feature Acceptance Rule

Every MVP feature must answer:

Does this reduce decision fatigue?

Does this improve the evening?

Does this create memorable experiences?

If not,

it belongs in V2.

Definition of Done

A feature is complete only when:

- UI is finished.
- UX is polished.
- Animations exist.
- Haptics are implemented.
- Accessibility is supported.
- Error handling works.
- Offline behavior is defined.
- Analytics events are added.
- Unit tests pass.
- Integration tests pass.

If one of these is missing,

the feature is **not finished**.

Golden Rule

Ship less.

Ship better.

The first version of UNPLND should feel surprisingly complete,

not surprisingly large.

Claude Instructions

Never add extra MVP features without updating this document.

If a feature is not listed here,

it is not part of Version 1.0.

Protect the MVP from feature creep.

Focus on excellence,

not quantity.
