UNPLND Onboarding Experience

Version 1.0

Status: MVP

Purpose

The onboarding experience introduces the value of UNPLND.

It should create excitement.

Not explain features.

Users should understand the benefit without reading long text.

Success Metric

The user reaches the Home Screen in under 60 seconds.

Target completion rate:

85%

Philosophy

Show.

Don't explain.

Let users feel the product.

Never overload with information.

Never ask unnecessary questions.

Emotional Journey

User opens app.

↓

Curious

↓

Recognizes the problem

↓

Feels understood

↓

Sees the solution

↓

Gets excited

↓

Creates account

↓

Ready to plan tonight

Duration

1–2 seconds

Content

Animated UNPLND Logo

Warm gradient background

Tiny logo animation

No buttons

No loading spinner

Purpose

Set the tone.

Screen 1

Headline

Stop wasting your evenings deciding what to do.

Subheadline

UNPLND plans unforgettable experiences in seconds.

Visual

Animated evening illustration.

Friends.

Restaurant.

City lights.

Warm atmosphere.

Primary CTA

Continue

Secondary

Skip

Screen 2

Headline

Planning shouldn't take longer than the evening itself.

Visual

Animated comparison.

Left:

Group chat.

"What should we do?"

"No idea."

Scrolling endlessly.

Right:

UNPLND.

One tap.

Evening ready.

Purpose

Make the problem obvious.

Screen 3

Headline

One app. Endless evenings.

Visual

AI generates a beautiful route.

Restaurant

↓

Bowling

↓

Cocktail Bar

↓

Night Walk

↓

Memory Album

Show the final result.

Not the AI.

Mini Interactive Demo

The user experiences UNPLND.

Question

Mood?

User taps

Cozy

Budget?

Fake loading

↓

Beautiful generated evening appears.

No real API yet.

Purpose

Create excitement.

Permissions

Location

Explain first.

"We use your location to create nearby plans."

Only then ask.

Notifications

Explain first.

"We'll remind you before your evening starts."

Then ask.

Never surprise users.

Authentication

Immediately after onboarding.

Never interrupt before the demo.

Users now understand why creating an account matters.

Progress Indicator

Simple.

Minimal.

Three dots.

Never show "Step 2 of 14".

Feels overwhelming.

Animations

Cards slide.

Background slowly moves.

Logo gently scales.

Buttons animate naturally.

No bounce.

No flashy effects.

Haptics

Every selection

↓

Light

Generate Demo

↓

Medium

Finish Onboarding

↓

Success

Copywriting

Short.

Friendly.

Optimistic.

Examples

Let's make tonight unforgettable.

Ready?

Your evening starts here.

Never

Our revolutionary AI platform...

Resume onboarding

Success Criteria

The user should finish onboarding thinking:

"I want to try this tonight."

Not:

"I understand how the app works."

Emotion comes before explanation.

DO NOT

Do NOT explain AI.

Do NOT explain technology.

Do NOT show long paragraphs.

Do NOT ask for preferences.

Do NOT ask for favorite food.

Do NOT ask for hobbies.

Do NOT ask for interests.

Do NOT request unnecessary permissions.

Do NOT make onboarding longer than one minute.

Future Improvements

Personalized onboarding.

Friend invitations.

Interactive animations.

Live AI demo.

Video backgrounds.

Claude Instructions

The onboarding should sell the experience.

Not the app.

Every screen should increase excitement.

Every animation should feel premium.

The user should reach the Home Screen excited to use UNPLND tonight.

That is success.
