18_PLANNER.md

AI Planner Specification

Version 1.0

Status: MVP

Priority: CRITICAL

Purpose

The Planner is the heart of UNPLND.

Everything else exists to support it.

If the Planner feels magical,

UNPLND succeeds.

If the Planner feels like a form,

UNPLND fails.

Core Principle

Planning should feel like talking to a friend.

Never like filling out a questionnaire.

The user answers one question at a time.

The next question appears naturally.

Target Time

Entire planning process:

30–45 seconds

Maximum:

60 seconds

Planner Flow

Optional only.

Never required.

AI Context

Before generation collect:

Location

Time

Weather

Opening Hours

Budget

Mood

Transport

Travel Time

Group Size

History

Favorites

Avoided Places

Current Events (Future)

Every parameter improves quality.

Generate Button

Text

Create my evening

Animation

Soft glow on ready.

Disabled until minimum inputs exist.

AI Thinking Screen

Never show a spinner.

Instead show progress.

Examples

Finding cozy restaurants…

Checking opening hours…

Looking for hidden gems…

Planning the perfect route…

Almost ready...

Background

Animated map.

Moving route.

Warm colors.

Generated Route

Display as beautiful timeline.

Never freeze UI.

Acceptance Criteria

A new user should complete the planner without asking:

"What does this mean?"

Everything must feel obvious.

The planner should feel fun.

Not like work.

DO NOT

Do NOT display long forms.

Do NOT ask unnecessary questions.

Do NOT ask everything at once.

Do NOT use dropdown menus.

Do NOT overload the screen.

Do NOT expose AI prompts.

Do NOT show technical language.

Do NOT make planning feel slow.

Golden Rule

The Planner is not a form.

It is a conversation.

If users smile while answering,

the Planner is working.

Claude Instructions

Protect the Planner.

Never simplify it into a traditional form.

Every interaction should feel premium.

Every answer should feel satisfying.

Users should finish planning excited to leave the house.

That is success.
