Route Experience Specification

Version 1.0

Priority: CRITICAL

Status: MVP

Purpose

The Route Screen is where planning becomes reality.

This screen transforms an AI recommendation into an actual experience.

Users should immediately want to leave the house.

The route should feel exciting before it even begins.

Core Goal

Show the entire evening in one beautiful, understandable timeline.

Never overwhelm.

Never confuse.

Everything should answer:

"What happens next?"

Primary Layout

Sticky Header

Alternative Stops

Supports

Pinch

Zoom

Rotate

Recenter

Never overload with controls.

Timeline

Vertical.

Chronological.

Animated.

Every stop appears as one connected journey.

Examples

18:30

↓

Dinner

↓

20:15

↓

Mini Golf

↓

22:30

↓

Cocktail Bar

↓

23:45

↓

Night Walk

Timeline should feel like a story.

Not a checklist.

Stop Card

Every stop contains

Large Photo

Title

Category

Address

Distance

ETA

Estimated Duration

Price

Opening Status

Short Description

Why this place?

Navigate

Replace Stop

Favorite

Expand

Every card should answer:

Why am I going here?

Why This Place

Every recommendation must include a human explanation.

Examples

Perfect for sunset.

Known for homemade pasta.

Quiet atmosphere for conversations.

Amazing city views after dark.

Great value within your budget.

Never say:

AI selected this.

Delight Checklist

✓ Every stop feels intentional.

✓ Timeline tells a story.

✓ Map feels smooth.

✓ Navigation is effortless.

✓ User feels excited.

✓ No information overload.

✓ Beautiful at first glance.

DO NOT

Do NOT show raw AI output.

Do NOT display long paragraphs.

Do NOT clutter the map.

Do NOT overwhelm with statistics.

Do NOT require scrolling before understanding the evening.

Do NOT use generic place descriptions.

Do NOT recommend impossible routes.

Success Criteria

The user should look at the route and think:

"I genuinely can't wait to start."

That emotional reaction is the success metric.

Claude Instructions

The Route Screen is not logistics.

It is anticipation.

Everything should build excitement for the evening ahead.

Optimize for emotion.

Not efficiency alone.

Every stop should feel like the next chapter of a story.
