33_NOTIFICATIONS.md

Smart Notification System

Version 1.0

Priority: HIGH

Status: MVP

Purpose

Notifications should be genuinely helpful.

Never distracting.

Never manipulative.

Every notification should answer one question:

"Does this improve the user's evening?"

If the answer is no,

do not send it.

Philosophy

UNPLND should interrupt users as little as possible.

The app exists to help people experience life,

not constantly think about the app.

Notification Categories

Planning

Evening

Albums

Weather

Friends (Future)

System

Premium

Planning Notifications

Examples

Your evening starts in one hour.

Ready to go?

↓

Continue Plan

Never send multiple reminders.

Evening Notifications

Examples

Time for your next stop.

Beautiful sunset in 20 minutes.

Traffic increased slightly.

Alternative available.

Only if useful.

Album Notifications

Examples

Your memory album is ready.

↓

Open Album

One notification only.

Never remind again.

Weather Notifications

Only when weather meaningfully changes.

Examples

Rain expected in 30 minutes.

Indoor alternative available.

or

Perfect sunset conditions tonight.

Want to adjust your route?

Friend Notifications (Future)

Invitation received.

Shared album updated.

Friend joined evening.

No social spam.

System Notifications

Maintenance

Critical updates

Security

Required app updates

Rare only.

Premium Notifications

Only

Major new features.

Never sales spam.

Maximum

One promotional notification per month.

Opt-in only.

Smart Timing

Never send during:

Sleep hours

Driving (where detectable)

Already active app usage

Meetings (future)

Always choose the least disruptive moment.

Quiet Hours

Default

22:30–08:00

Respect system settings.

Allow customization.

Deep Links

Every notification opens the correct screen.

notification_opened

notification_dismissed

deep_link_opened

Only meaningful events.

Never optimize for open rates alone.

Performance

Notification delivery

Reliable.

Deep links

Instant.

Local notifications

Battery efficient.

Delight Checklist

✓ Helpful.

✓ Friendly.

✓ Calm.

✓ Timely.

✓ Easy to dismiss.

DO NOT

Do NOT send daily engagement reminders.

Do NOT use fake urgency.

Do NOT spam users.

Do NOT manipulate with FOMO.

Do NOT send irrelevant promotions.

Success Criteria

Users should think:

"That notification was actually useful."

Not:

"Another app bothering me."

Golden Rule

Silence is better than a useless notification.

Every notification should earn the right to exist.

Claude Instructions

Whenever adding a notification,

answer these questions:

Why now?

Why this user?

What value does it create?

If the answer is weak,

do not send it.

Notifications should feel like thoughtful reminders from a friend.

Not advertisements.
