UNPLND Product Roadmap

Version 2+

Priority: Strategic

Status: Future

Purpose

This document defines the future direction of UNPLND.

The MVP solves one problem extremely well.

Version 2 expands the experience without compromising the mission.

Future features must support real-world experiences.

Not screen time.

Philosophy

Expand carefully.

Every new feature must answer:

Does this help people create more meaningful memories?

If not,

it does not belong in UNPLND.

Phase 2

Social Experiences

Friends

Shared Planning

Shared Albums

Temporary Live Location

Adventure Invitations

Collaborative Memories

Private Activity Feed

Adventure Packs

Premium Feature

Examples

Romantic Evenings

Road Trips

Hidden Nature

Christmas Nights

Weekend Escapes

Student Budget

Under €25

Sunset Collection

International City Packs

Professionally curated.

Continuously updated.

Memory Map

Interactive world map.

Every completed evening becomes a glowing marker.

Users slowly build their own map of memories.

Memory Album

Seasonal Experiences

Christmas Markets

Autumn Colors

Cherry Blossoms

Summer Nights

Halloween

Snow Adventures

Dynamic collections.

Local Events

Concerts

Festivals

Markets

Sports

Pop-up events

Integrated into planning.

Restaurant Reservations

Optional integrations.

Reserve tables.

Book activities.

Purchase tickets.

Always optional.

AI Personalization

Learn from

Completed evenings

Favorites

Skipped places

Preferred pace

Budget habits

Only with user consent.

Couple Journal

Private relationship memories.

Anniversaries.

Favorite places.

Shared albums.

Memory timeline.

Family Mode

Kid-friendly planning.

Parks.

Zoos.

Indoor play.

Safety optimized.

Creator Partnerships

Selected local creators curate experiences.

No influencer feed.

Quality first.

Business Dashboard

Restaurants and venues can

Manage listings.

Offer verified information.

Suggest events.

Sponsored placement only if clearly labeled.

Wearables

Apple Watch

Quick evening status.

Next stop.

ETA.

Widgets

Upcoming evening.

Golden Hour countdown.

Recent memories.

Quick planner.

Desktop

Planning on larger screens.

Album management.

Travel planning.

AI Voice Assistant

Future

Hands-free planning.

Voice edits.

Navigation updates.

Natural conversation.

Sustainability

Future score.

Walking routes.

Cycling routes.

Public transport preference.

Optional only.

International Expansion

Localized experiences.

Local holidays.

Regional planning styles.

Native recommendations.

Success Criteria

Every V2 feature should increase:

Real-world experiences.

Album creation.

Memory quality.

User trust.

Never screen addiction.

Features Explicitly Rejected

Endless scrolling feeds.

Follower economy.

Public like counts.

Influencer system.

Attention optimization.

Reward systems based on app usage.

Daily streak pressure.

Loot boxes.

Gambling mechanics.

Aggressive monetization.

Delight Checklist

✓ Strengthens memories.

✓ Supports relationships.

✓ Scales naturally.

✓ Feels like UNPLND.

✓ Protects the mission.

Golden Rule

Growth must never change the identity of the product.

The mission remains constant.

Only the possibilities expand.

Claude Instructions

When implementing future features,

always check this roadmap first.

Do not move V2 features into the MVP unless explicitly approved.

Protect the simplicity of Version 1.

Build a foundation,

not a feature factory.
