46_COMPONENT_LIBRARY.md

UNPLND Component Library

Version 1.0

Priority: CRITICAL

Status: Foundation

Purpose

This document defines every reusable UI component used throughout UNPLND.

No screen should invent its own UI.

Screens compose components.

Components define the product.

Philosophy

Build once.

Reuse forever.

Consistency is more valuable than uniqueness.

Component Categories

Layout

Navigation

Buttons

Cards

Inputs

Lists

Feedback

Maps

Albums

Planner

Profile

Shared

Layout Components

AppScaffold

PrimaryScreen

SectionHeader

ContentContainer

SafeAreaWrapper

BottomSpacing

Divider

Spacer

All screens must use these layout primitives.

Navigation Components

BottomNavigationBar

TopNavigationBar

BackButton

SearchButton

ProfileAvatar

NotificationButton

FloatingActionButton (rare)

Buttons

PrimaryButton

SecondaryButton

TextButton

IconButton

DangerButton

LoadingButton

CTAButton

Never create custom buttons outside this library.

Cards

WeatherCard

PlanCard

AlbumCard

MemoryCard

ExperienceCard

CategoryCard

PremiumCard

ProfileCard

CollectionCard

StatisticsCard

Cards share:

Radius

Padding

Shadow

Spacing

Typography

Planner Components

MoodSelector

BudgetSlider

GroupSelector

TransportSelector

PreferenceChip

PlannerProgress

QuestionCard

RoutePreview

GenerateButton

Timeline Components

Timeline

TimelineItem

CurrentStopCard

CompletedStopCard

UpcomingStopCard

ProgressIndicator

ETAWidget

Album Components

AlbumCover

PhotoCard

MemoryNote

TimelineSection

WeatherBadge

MapPreview

MemoryMomentBadge

ShareButton

Input Components

SearchField

TextField

PasswordField

Dropdown

SegmentedControl

DatePicker

TimePicker

Switch

Checkbox

RadioOption

ChipSelector

Discover Components

HeroBanner

ExperienceCarousel

CollectionRow

FilterChip

FeaturedCard

RecommendationCard

TrendingSection

Profile Components

ProfileHeader

AdventureSummary

StatsGrid

MemoryMapPreview

RecentAlbumsRow

FavoriteCollection

PremiumBanner

Feedback Components

Toast

Snackbar

ErrorCard

SuccessCard

WarningCard

OfflineBanner

LoadingOverlay

EmptyState

Map Components

RouteMap

MapMarker

CurrentLocationButton

RouteSummary

MapLegend

Empty States

NoAlbums

NoPlans

NoFavorites

Offline

NoResults

NoNotifications

All empty states include:

Illustration

Headline

Description

Primary Action

Skeleton Components

AlbumSkeleton

PlanSkeleton

CardSkeleton

ListSkeleton

ProfileSkeleton

WeatherSkeleton

Never show blank screens.

Dialog Components

ConfirmationDialog

DeleteDialog

PermissionDialog

ErrorDialog

PremiumDialog

Dialogs should be rare.

Prefer bottom sheets.

Bottom Sheets

StandardBottomSheet

RouteSheet

ReplaceStopSheet

ShareSheet

PremiumSheet

SettingsSheet

Rounded.

Comfortable.

Consistent.

Chips

MoodChip

BudgetChip

DistanceChip

WeatherChip

CategoryChip

SelectableChip

Always use shared styles.

Icons

Central icon library.

Never mix icon styles.

Rounded icons only.

Illustrations

Stored centrally.

Used consistently.

No random illustrations.

Motion Components

FadeIn

SlideUp

ScaleIn

RouteDrawAnimation

AlbumOpenAnimation

Reusable only.

Accessibility

Every component must support:

VoiceOver

Dynamic Type

Reduced Motion

Minimum touch target

High contrast

Accessibility is built into the component.

Not added later.

Component Rules

Every component must define:

Purpose

Properties

States

Loading

Error

Accessibility

Animation

Haptics

Analytics

If one is missing,

the component is incomplete.

Versioning

Components evolve.

Never break existing usage.

Deprecate carefully.

Naming Convention

Component names

PascalCase

Files

snake_case.dart

One public component per file.

DO NOT

Do NOT duplicate components.

Do NOT slightly modify existing components.

Do NOT create one-off UI.

Do NOT bypass the design system.

Every new component requires approval.

Delight Checklist

✓ Reusable.

✓ Consistent.

✓ Accessible.

✓ Beautiful.

✓ Easy to maintain.

Golden Rule

Screens are temporary.

Components are forever.

Invest in components.

The product will scale naturally.

Claude Instructions

Before creating a new component ask:

Can an existing component solve this?

If yes,

reuse it.

Only create a new component when absolutely necessary.

Consistency always wins.
