UNPLND Claude Constitution

Version 1.0

Priority: HIGHEST

Status: Mandatory

Purpose

This document defines the immutable rules for developing UNPLND.

Every other document depends on this one.

If another document conflicts with this Constitution,

the Constitution always wins.

Rule 1

Protect the Mission

UNPLND exists to help people create meaningful real-world memories.

Every feature must strengthen this mission.

If a feature weakens it,

do not build it.

Rule 2

Real Life Comes First

The goal is not to keep users inside the app.

The goal is to help them leave the app

and enjoy their evening.

Optimize for life,

not screen time.

Rule 3

Quality Beats Quantity

Never add a feature because competitors have it.

Only add features that clearly improve the experience.

Remove unnecessary complexity.

Rule 4

Emotion Beats Efficiency

A perfectly optimized route is useless

if it feels boring.

Always optimize for memorable experiences.

Not only logistics.

Rule 5

Trust Is Sacred

Never manipulate users.

Never use dark patterns.

Never create fake urgency.

Never sell personal data.

Never compromise privacy.

Trust takes years to build

and seconds to lose.

Rule 6

Technology Is Invisible

Users should never think about AI,

algorithms,

or backend systems.

Technology supports the experience.

It never becomes the experience.

Rule 7

Consistency Above Creativity

Reuse components.

Reuse patterns.

Reuse language.

The product should feel coherent.

Never invent new styles without updating the Design System.

Rule 8

Accessibility Is Not Optional

Every feature must support:

VoiceOver

Dynamic Type

Reduced Motion

Readable contrast

Minimum touch targets

Accessibility is built in,

never added later.

Rule 9

Performance Is a Feature

Every animation.

Every transition.

Every request.

Every interaction.

Must feel instant.

Users should never wait without understanding why.

Rule 10

Offline Matters

Assume users will lose connection.

Protect active evenings.

Protect memories.

Gracefully degrade functionality.

Never lose user progress.

Rule 11

Security Before Convenience

Never trust the client.

Validate everything server-side.

Protect user memories like personal journals.

Rule 12

The Planner Is Sacred

Never simplify the planner into a generic form.

It must feel like a conversation.

Planning should feel enjoyable.

Not like work.

Rule 13

Albums Are Memories

Albums are emotional artifacts.

Never reduce them to photo galleries.

The story matters more than the pictures.

Rule 14

Social Supports Reality

Every social feature must help people meet in real life.

Never create engagement loops.

Never optimize for likes or followers.

Rule 15

Notifications Must Earn Their Place

Every notification must answer:

Why now?

Why this user?

What value does it create?

Silence is better than noise.

Rule 16

Every Screen Needs a Purpose

Before creating a screen ask:

Why does this exist?

Can an existing screen solve the same problem?

Avoid duplication.

Rule 17

Every Feature Needs Delight

Every feature should contain

at least one small moment of joy.

Never force it.

Never overdo it.

Subtle delight creates premium products.

Rule 18

Never Break the Brand

Every feature,

every animation,

every word,

every illustration,

must feel unmistakably like UNPLND.

Rule 19

Build for Years

Never choose the easiest implementation.

Choose the one that remains maintainable.

Think in years,

not sprints.

Rule 20

When in Doubt

Choose the option that:

Creates more memories.

Builds more trust.

Feels more human.

Simplifies the experience.

Encourages users to close the app

and enjoy real life.

That option is almost always the correct one.

Final Principle

UNPLND is not trying to become

the biggest app.

UNPLND is trying to become

the most loved app

for creating unforgettable evenings.

Never forget that.

Claude Instructions

Before implementing **any** feature,

read this Constitution first.

Every decision should be validated against these principles.

If a feature violates even one core principle,

stop.

Rethink.

Redesign.

The Constitution is not documentation.

It is the foundation of UNPLND.
